Retesting of Outfall # 2

Attached lab analysis report represents storm water grab sample taken at the Defense National Stockpile Depot in Point Pleasant, WV (DLA/DNSC-MOPP) on JAN 17, 2002. This sample was taken only from outfall # 2 as a follow-up to the regularly scheduled biannual testing accomplished on DEC 13, 2001. Original sampling of all outfalls resulted in normal readings with the exception of outfall # 2 pH levels. Drastically uncharacteristic readings indicated potentially erroneous testing results. In response, Outfall # 2 was retested on JAN 17, 2002, for pH, BOD, and TSS to ensure that wastewater pH from this drain is within normal parameters. Although the BOD and TSS were originally found to be normal, the retesting was conducted in a manner that ensures total procedural sample integrity.

Subject retesting for Outfall # 2 on JAN 17, 2002 results indicate normal readings for pH, BOD and TSS. Please attach these results to 2002 report dated JAN 17, 2002. All testing completed.

Sample bottles, preservative, analyses and attached results were prepared and supplied by Analytical Laboratory Services, Inc. (ALS), 34 Dogwood Lane, Middletown, PA 17057.

As an added measure of quality assurance follow-up, this office will conduct the first CY 2002 semi-annual overall storm water testing at this site at the soonest possible significant rain event.

Attached lab analysis reports represent storm water grab samples taken at the Defense Nation Stockpile Depot (DLA/DNSC-MOPP) on DEC 13, 2001.

Sample bottles, preservative, analyses and attached results were prepared and supplied by Analytical Laboratory Services, Inc., 34 Dogwood Lane, Middletown, PA 17057.

Note: Upon analysis, ALS notified the undersigned that the results in Outfall # 2 for PH were possibly faulty While minimal precipitation has occurred in the time since the initial sampling, Outfall # 2 was retested this date for PH only to ensure that wastewater PH from this drain is within normal parameters. Results are expected within three weeks, and will be forwarded to your office immediately upon receipt by this office.

As an added measure of surveillance, this office will conduct the first CY 2002 semi-annual overall storm water testing at this site at the soonest possible significant rain event.

JAN 17, 2002

MEMORANDUM FOR DNSC-EQ

SUBJECT: Storm water Sampling Results for Point Pleasant WV Depot, JAN 17, 2002

Attached lab analysis reports represent storm water grab samples taken on DEC 13, 2001. Samples taken by the undersigned from all three outfalls with the assistance of Mr. John Eller, Material Handler Supervisor, DNSC-MOPP.

Sample bottles, preservative, and cooler prepared and supplied by Analytical Laboratory Services, Inc., 34 Dogwood Lane, Middletown, PA 17057, which also performed all analyses and the attached reports.

Note: Upon analysis, ALS notified the undersigned that the results in Outfall # 2 for PH were possibly faulty. While minimal precipitation has occurred in the time since the initial sampling, Outfall # 2 was retested this date for PH only to ensure that wastewater PH from this drain is within normal readings. Results are expected within three weeks, and will be forwarded to State of WV and DNSC-E upon receipt

As an added measure of surveillance, this office will conduct the first semi-annual overall storm water testing at this site at the soonest possible significant rain event for CY 2002.

Location	: Outfall #1	Date Received	: 12/14/01
Sample State	: Water Grab	Date Approved	: 12/27/01
Collector	: JR	Discard Date	: 01/11/02

TEST/PARAMETER	RESULT	UNITS	REPORTING LIMIT	METHOD
TER QUALITY				
Ammonia-Nitrogen	N.D.	mg/l	0.10	350.3
Biochemical Oxygen Demand	N.D.	mg/l	2	5210-B
Chemical Oxygen Demand	50	mg/l	15	410.4
Oil and Grease, Hexane Ext.	N.D.	mg/l	2	1664
pH	7.41			150.1
Total Suspended Solids	11	mg/l	5	160.2

N.D. - Not Detected

The pH of the "Wet Chemistry" bottle was adjusted to pH < 2 by the addition of sulfuric acid upon receipt at the laboratory.

This sample was received by the laboratory after the recommended holding time for pH had elapsed.

This report relates only to the samples as received by the laboratory, and may only be reproduced in full. If you have any questions in reference to this analysis please contact your ALSI coordinator or the laboratory manager listed at the bottom of this report at 717-944-5541.
