## COVER SHEET

**LEAD AGENCY:** Defense Logistics Agency (DLA), Defense National Stockpile Center (DNSC)

**COOPERATING AGENCIES:** U.S. Department of Energy, U.S. Environmental Protection Agency (EPA)

**TITLE OF THE PROPOSED ACTION:** To select and implement an approach for the long-term (i.e., 40 years) management of the defense stockpile of elemental mercury, which is no longer needed for national defense.

**POINT OF CONTACT:** Information concerning this environmental impact statement can be obtained at the project Web site ([www.mercuryeis.com](http://www.mercuryeis.com)), by calling 1-888-306-6682, or by writing to the Project Manager, ATTN: Project Manager, Mercury Management EIS, DNSC-E, Defense National Stockpile Center, 8725 John F. Kingman Road, Suite 3229, Ft. Belvoir, VA 22060-6223.

**APPROVAL AUTHORITY:** DLA, Staff Director, Office of Environment and Safety

**DOCUMENT DESIGNATION:** Draft Environmental Impact Statement (Draft EIS)

**AFFECTED JURISDICTIONS:** Hawthorne, NV; New Haven, IN; Oak Ridge, TN; Romulus, NY; Somerville, NJ; Tooele, UT; and Warren, OH

**ABSTRACT:** DNSC is responsible for the disposition of stockpiled items declared excess to national defense needs. The United States Congress has determined that the U.S. Department of Defense no longer needs to maintain a stockpile of mercury due to the increased use of mercury substitutes and due to increases in the nation's secondary production (i.e., recovery/recycling). This excess mercury was offered for sale in open competitions until 1994 when concerns over mercury accumulation in the global environment prompted DNSC to suspend sales. The DNSC inventory of mercury (approximately 4,890 tons; 4,436 metric tons) is currently stored in enclosed warehouses at four sites in the United States. As custodian of the mercury, DNSC must decide on a strategy for long-term management of this material. In compliance with the National Environmental Policy Act and Defense Logistics Agency Regulation 1000.22, Environmental Considerations in DLA Actions in the United States, DNSC has prepared this Draft EIS to evaluate the environmental impacts of a range of reasonable alternatives for long-term management (i.e., 40 years) of the excess mercury. The alternatives are: (1) no action, i.e., maintaining storage at the four existing sites; (2) consolidation and storage at one of the current DNSC mercury storage sites or at one of three other candidate locations; and (3) sale of the mercury inventory. The agency's preferred alternative is consolidated storage. This Draft EIS describes the potential environmental, human health, and socioeconomic impacts of these alternatives, together with cost considerations. Several treatment technologies were considered as possible alternatives for mercury management. Based on the immaturity of bulk mercury treatment technologies and the lack of an EPA-approved path forward for treatment and disposal of elemental mercury, this alternative is not considered viable and is not evaluated in detail in this EIS.

**COMMENTS:** Comments on this Draft EIS should be provided within 90 days of the publication of the Notice of Availability in the Federal Register to ensure consideration in preparation of the Final EIS. Comments should be made by calling 1-888-306-6682 by sending written comments to the project fax number (1-888-306-8818) or mailing address provided above, or via the web site at [www.mercuryeis.com](http://www.mercuryeis.com). Public meetings to solicit comments will be held at locations and dates to be announced separately.

## List of Acronyms

ATSDR	Agency for Toxic Substances and Disease Registry
BLM	Bureau of Land Management
BRAC	U.S. Army Base Realignment and Closure
CEQ	Council on Environmental Quality
CERCLA	Comprehensive Environmental Response, Compensation, and Liability Act
CFR	Code of Federal Regulations
D&D	decontamination and decommissioning
DLA	Defense Logistics Agency
DNSC	Defense National Stockpile Center
DoD	U.S. Department of Defense
DOE	U.S. Department of Energy
DOT	U.S. Department of Transportation
EA	environmental assessment
ECDC	East Carbon Development Corporation
EIS	environmental impact statement
EO	Executive order
EPA	U.S. Environmental Protection Agency
EPC	exposure point concentration
FONSI	Finding of No Significant Impact
FTE	full-time equivalent
HQ	Hazard Quotient
ISC	Installation Spill Contingency
MM EIS	<i>Mercury Management Environmental Impact Statement</i>
MMI	Modified Mercali Intensity
NEPA	National Environmental Policy Act
NESHAP	National Emission Standards for Hazardous Air Pollutants
NIOSH	National Institute for Occupational Safety and Health
NPDES	National Pollutant Discharge Elimination System
NRHP	National Register of Historic Places
ORR	Oak Ridge Reservation
OSHA	Occupational Safety and Health Administration
PM <sub>10</sub>	particulate matter less than or equal to 10 microns in diameter
PSD	prevention of significant deterioration

RCRA	Resource Conservation and Recovery Act
ROD	Records of Decision
ROI	region of influence
SHPO	State Historic Preservation Officer
SPCC	Spill Prevention Control and Countermeasures
SWPPP	Storm Water Pollution Prevention Plan
USFWS	U.S. Department of the Interior, Fish and Wildlife Service
USGS	U.S. Geological Survey
VRM	Visual Resource Management
Y-12	U.S. Department of Energy's Y-12 National Security Complex.

## Units of Measure

EC	degrees Celsius (Centigrade)
EF	degrees Fahrenheit
µg	microgram
46E26'07"	46 degrees, 26 minutes, 7 seconds
cm	centimeter
dB	decibel
dBA	decibel, A-weighted
ft	foot
ft <sup>2</sup>	square foot
ft <sup>3</sup>	cubic foot
g	gram
g	gravitational acceleration
gal	gallon
ha	hectare
hr	hour (in compound units)
in	inch
kg	kilogram
km	kilometer
km <sup>2</sup>	square kilometers
kV	kilovolt
kVa	kilovolt-ampere
KWh	kilowatt-hour
l	liter
lb	pound
m	meter
m <sup>2</sup>	square meter
m <sup>3</sup>	cubic meter
mg	milligram
mi	mile
min	minute
mph	miles per hour
MW	megawatt
MWe	megawatt electric
MWh	megawatt-hour
pH	hydrogen ion concentration
PM <sub>2.5</sub>	particulate matter less than or equal to 2.5 µm in diameter
PM <sub>10</sub>	particulate matter less than or equal to 10 µm in diameter
s	second

ton	short ton
yd	yard
yd <sup>3</sup>	cubic yard
yr	year (in compound units)
